

Cerakote™

CERAMIC COATINGS

Firearm Coatings & High Temperature Coatings Combination Training

The Cerakote Firearm & High Temp combination training course is a single training (one participant per date) which takes two days. Half of the days will be taken for theory (as example product knowledge & processing, advertising), the rest will be used for practical training.

Benefits for you, next to the certificate and the knowledge of the product use:

- Discount on color orders - 10% on Tester/Pint/Quart and 5% on Gallon
- A listing on the Cerakote US & Europe website as an certified applicator for firearm and high temperature coatings (increasing number of customers)
- Cerakote logo files to use for your advertising
- The ability to order personalized print flyer for your advertisement

The course fee is 2.000,00 EUR net and must be paid 4 weeks before the course starts. Obligated, a deposit of 20% for the appointment booking. Appointments can be made individually. Starting day is usually Tuesday or Wednesday.

Training Topics:

- Metal Prep
- Out-gassing
- Racking Techniques
- Coating Selection for various applications
- Basic to advanced ceramic application
- Proper curing techniques and schedules
- Problem solving and troubleshooting defects
- Proper equipment and operation
- Re-works
- Cost analysis
- Marketing
